UX Improvement Report

2 Aug, 2024

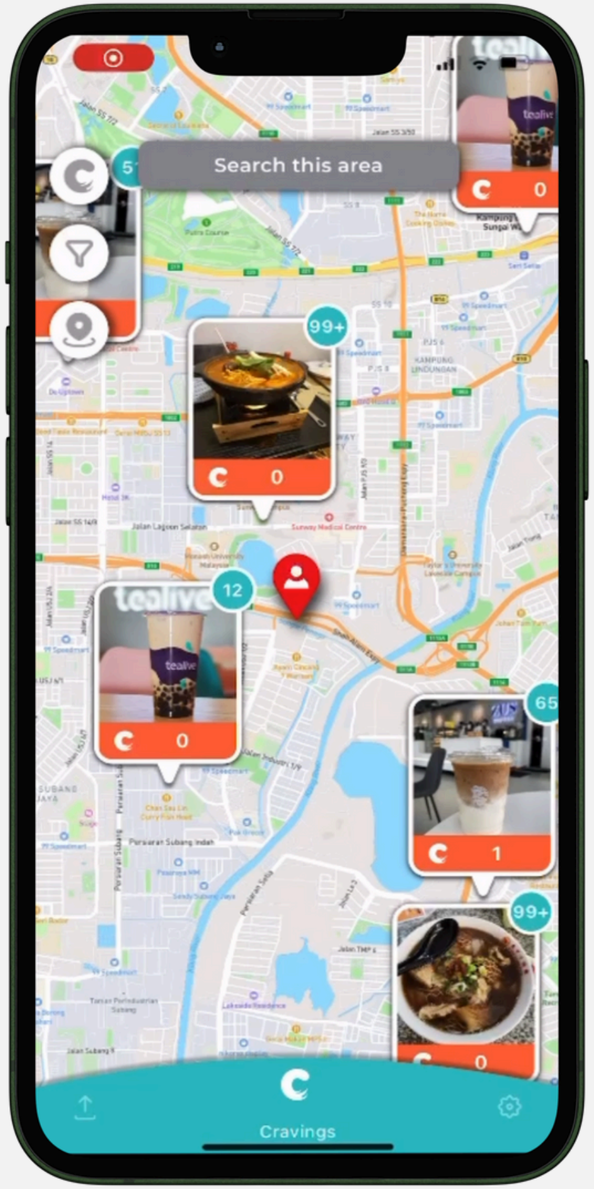
Table of Contents

- Cravings
- Recommendations

Cravings

Cravings

- The clustering moves every time the user slightly swipes the screen.
- Decrease the clustering of images.

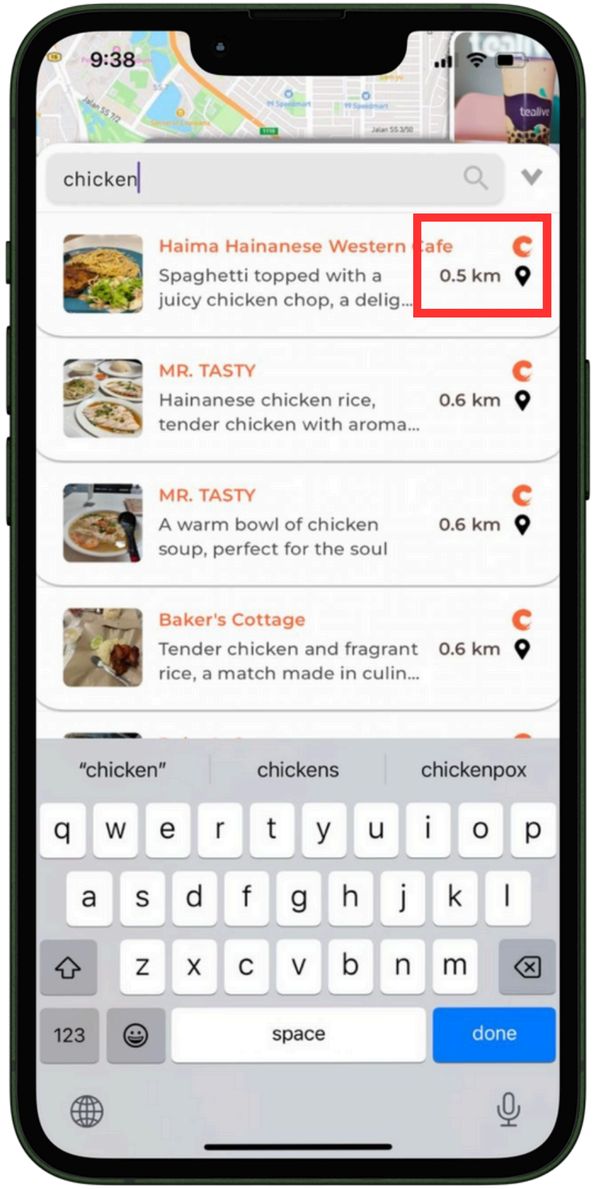


Live App

Recommendations

Recommendations

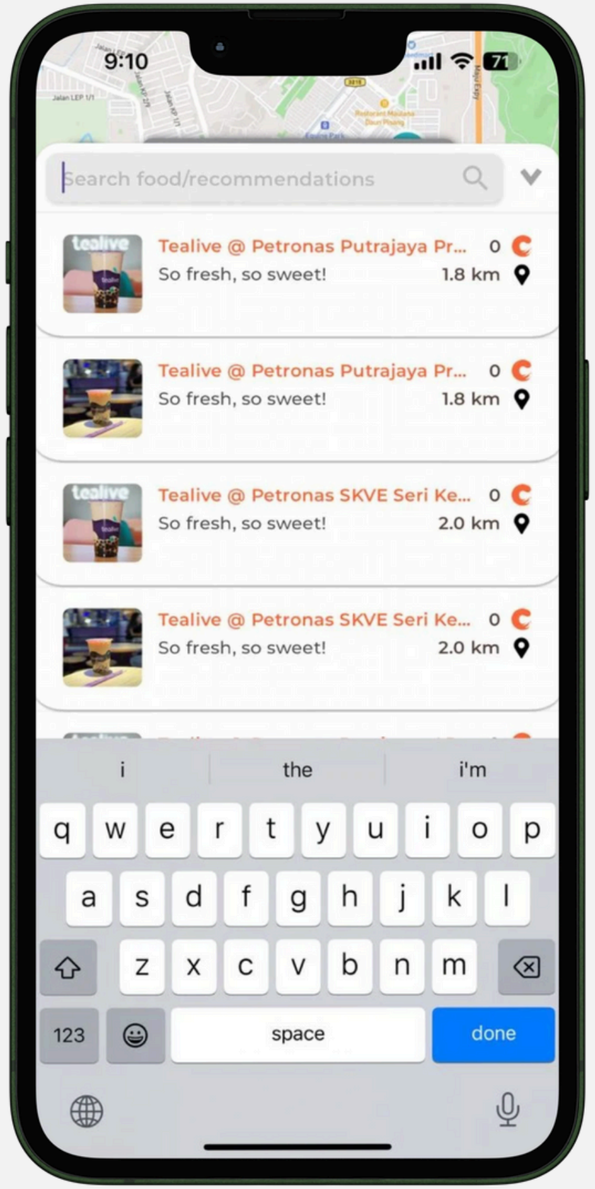
- The number of Cravings is not showing after searching/using the search bar.



Live App

Recommendations

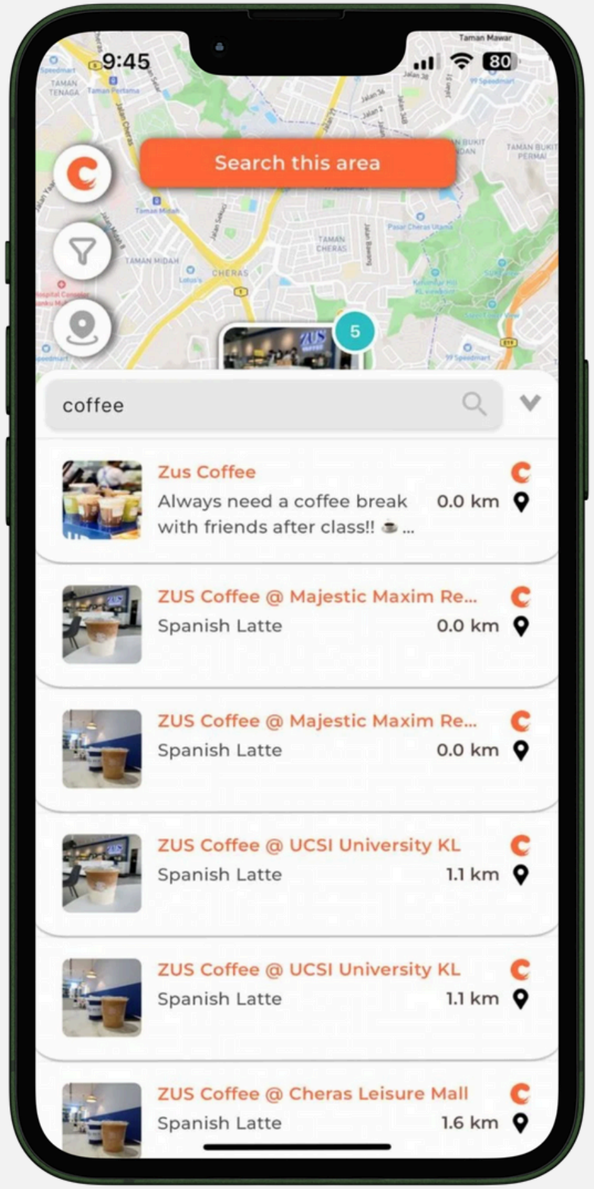
- The map bumps up when users press on the search bar.
- The recommendations bar and map should be stationary while **only the keyboard goes up.**



Live App

Recommendations

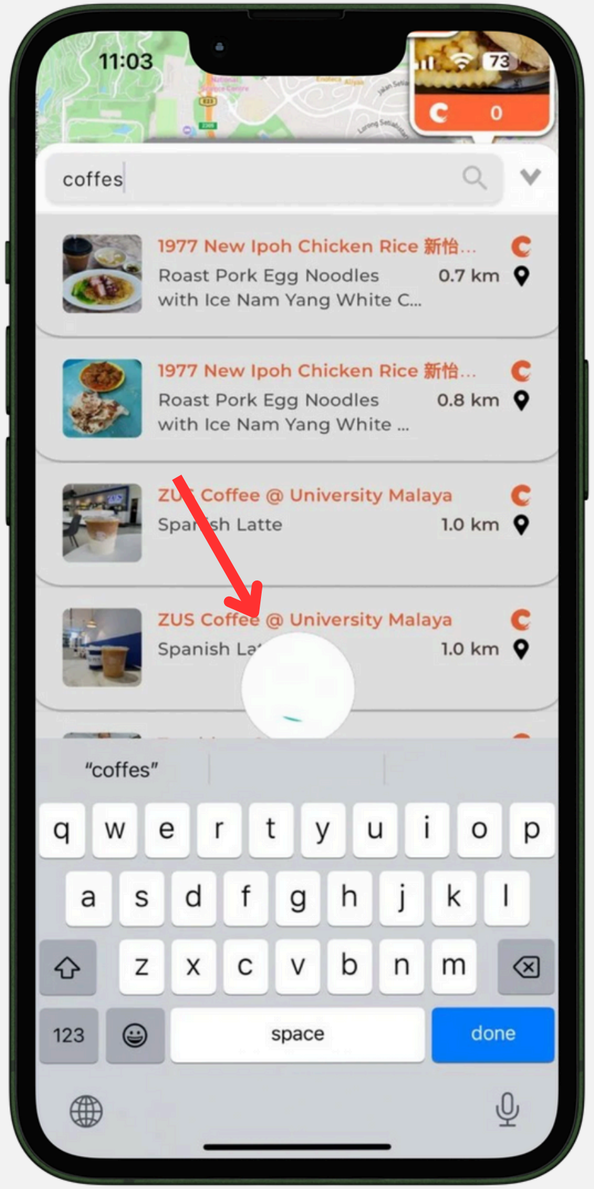
- The posts made by users can be found in the recommendations list.
- The posts should not be available in the recommendations list and on the map **unless approved in the secondary app**.



Live App

Recommendations

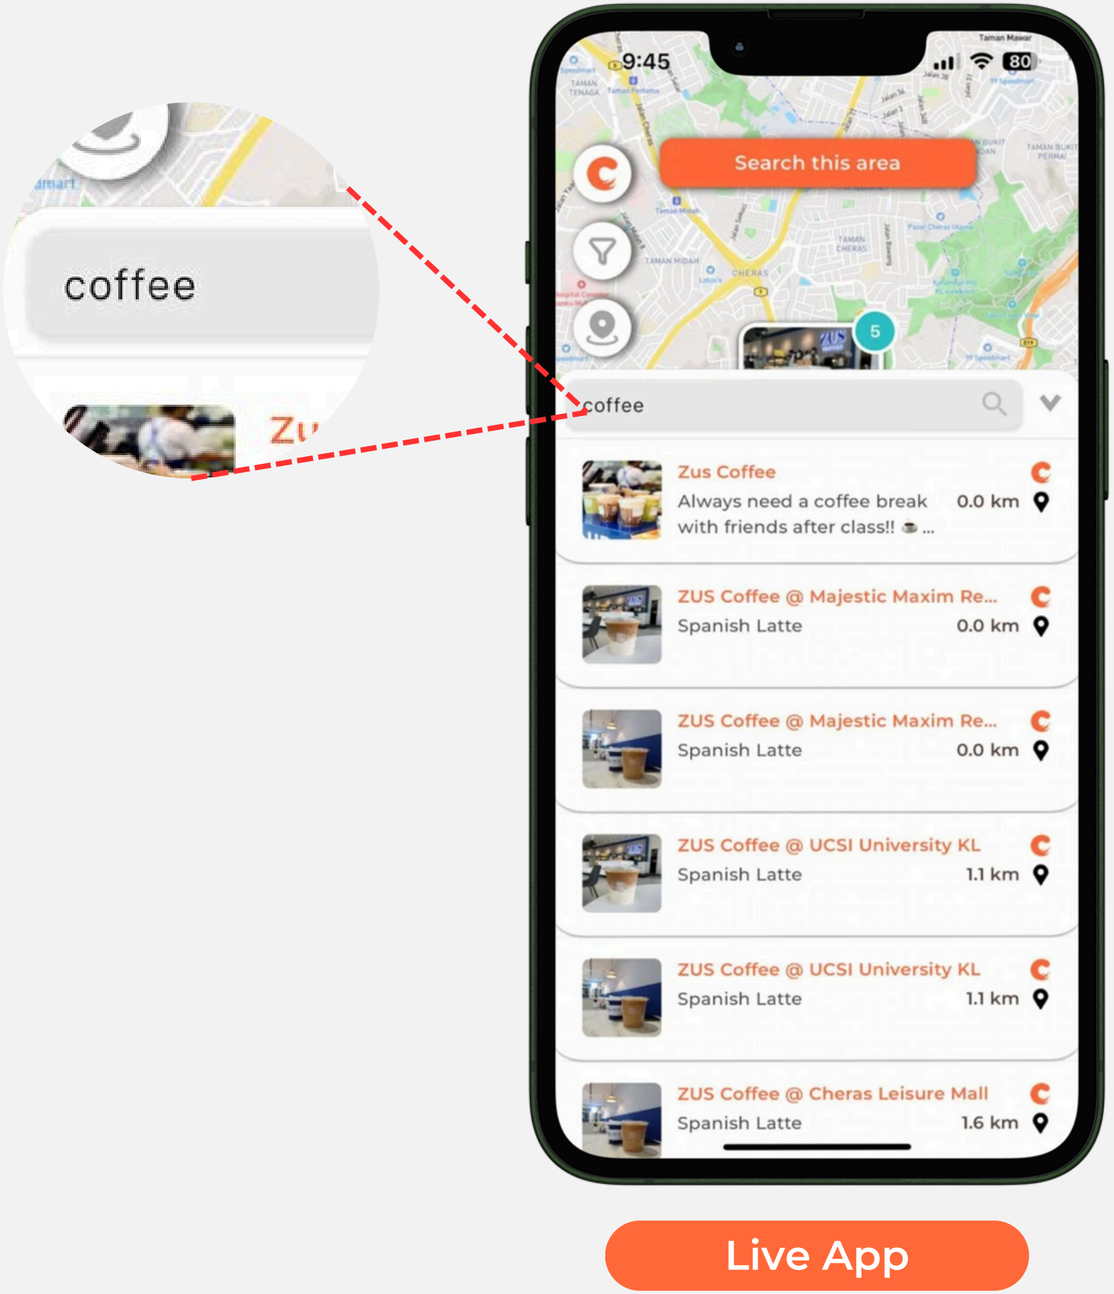
- Remove the loading animation when loading searches in the recommendations bar.
- The results should show instantly whenever the user types in each letter.



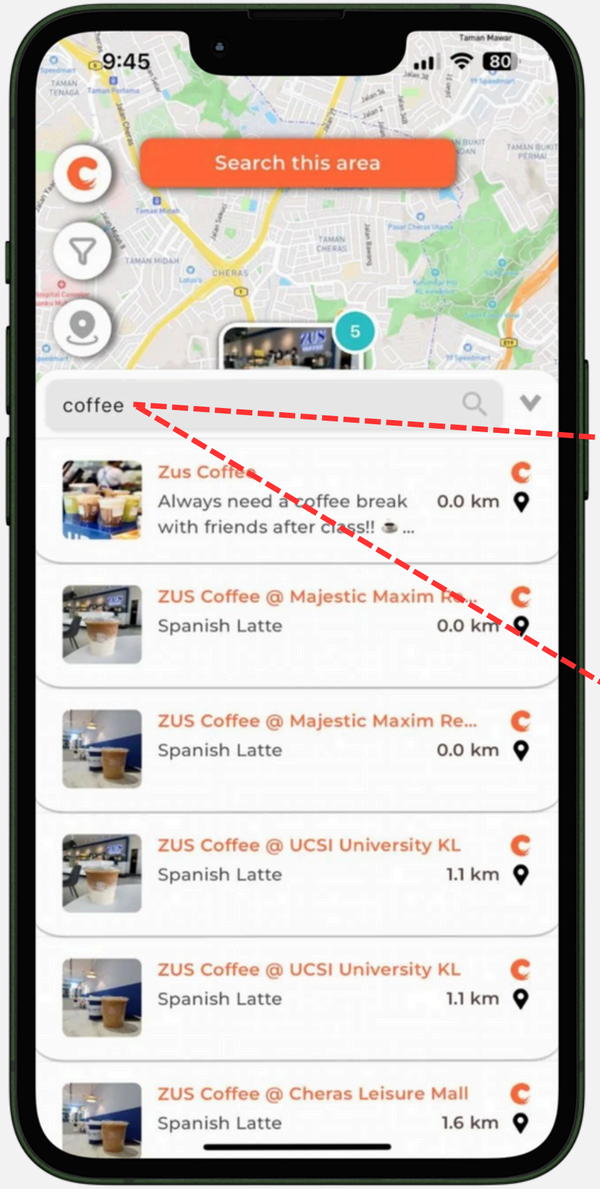
Live App

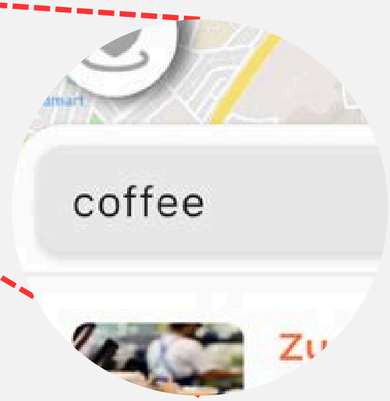
Search Bar

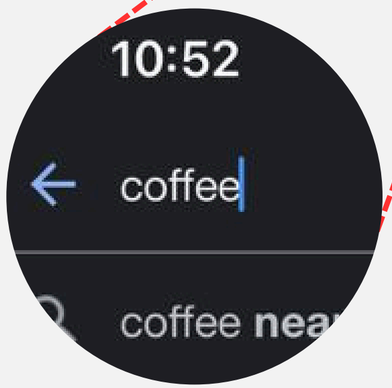
- The spacings between the letters when typing are too far from each other. It should be closer.
- **Important note:** Refer to the next page to see the differences.

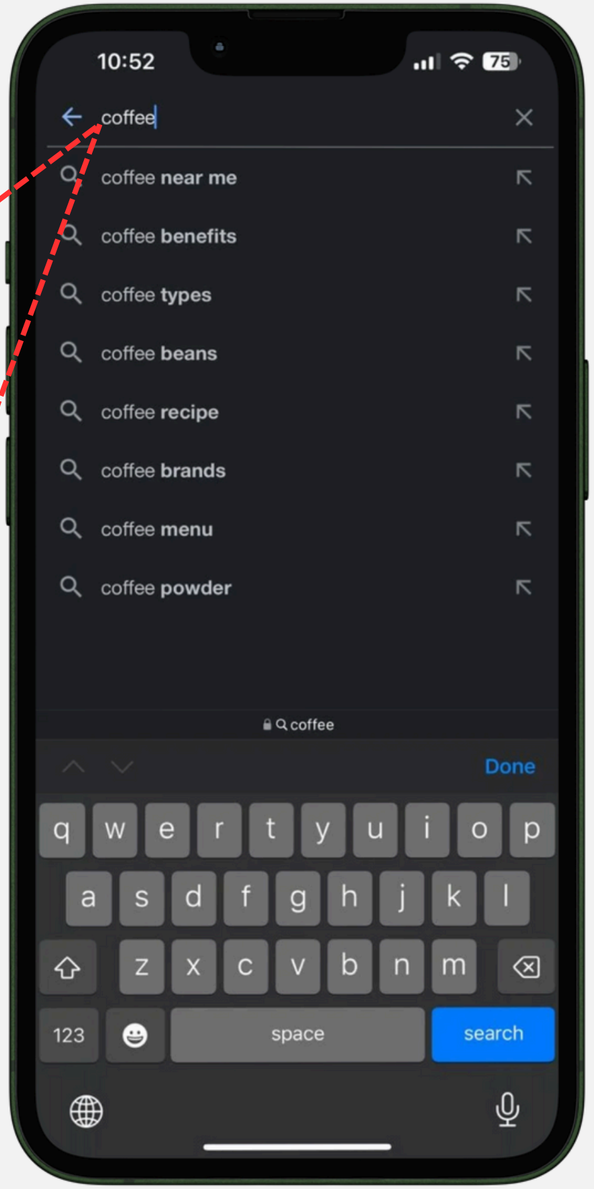


Live App







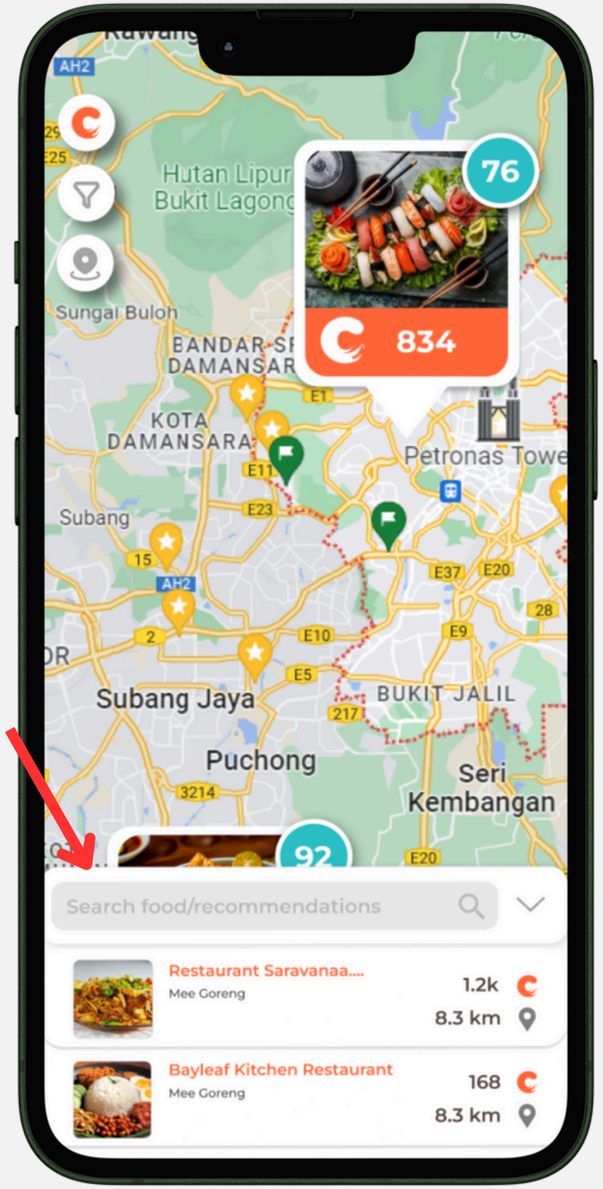


Live App

Sample on Safari

Search Bar

- Remove drop shadow from the search bar.



Live App

Search Bar

- After the user presses on the search bar, the fill of the search bar becomes **White (#FFFFFF)**, the placeholder color becomes **Light Grey (#DCDCDC)** and there will be a stroke on the search bar with the color of **Crave Orange (#FF6839)**.
- The search icon then changes into a clear all icon.
- Make sure the transition **when users tap on the search bar** is smooth.
- **Important note:** Refer to the next slide to for a better visualization.
