Mobile App Testing Report

27 August, 2024

Table of Contents

- **Filtering**
- **Carousell**
- **Posting**

Filtering

Filtering

- After user searches for location, the screen will go blank if the user taps the location name a few times.
- The screen also goes blank if the user searches location and presses the map.
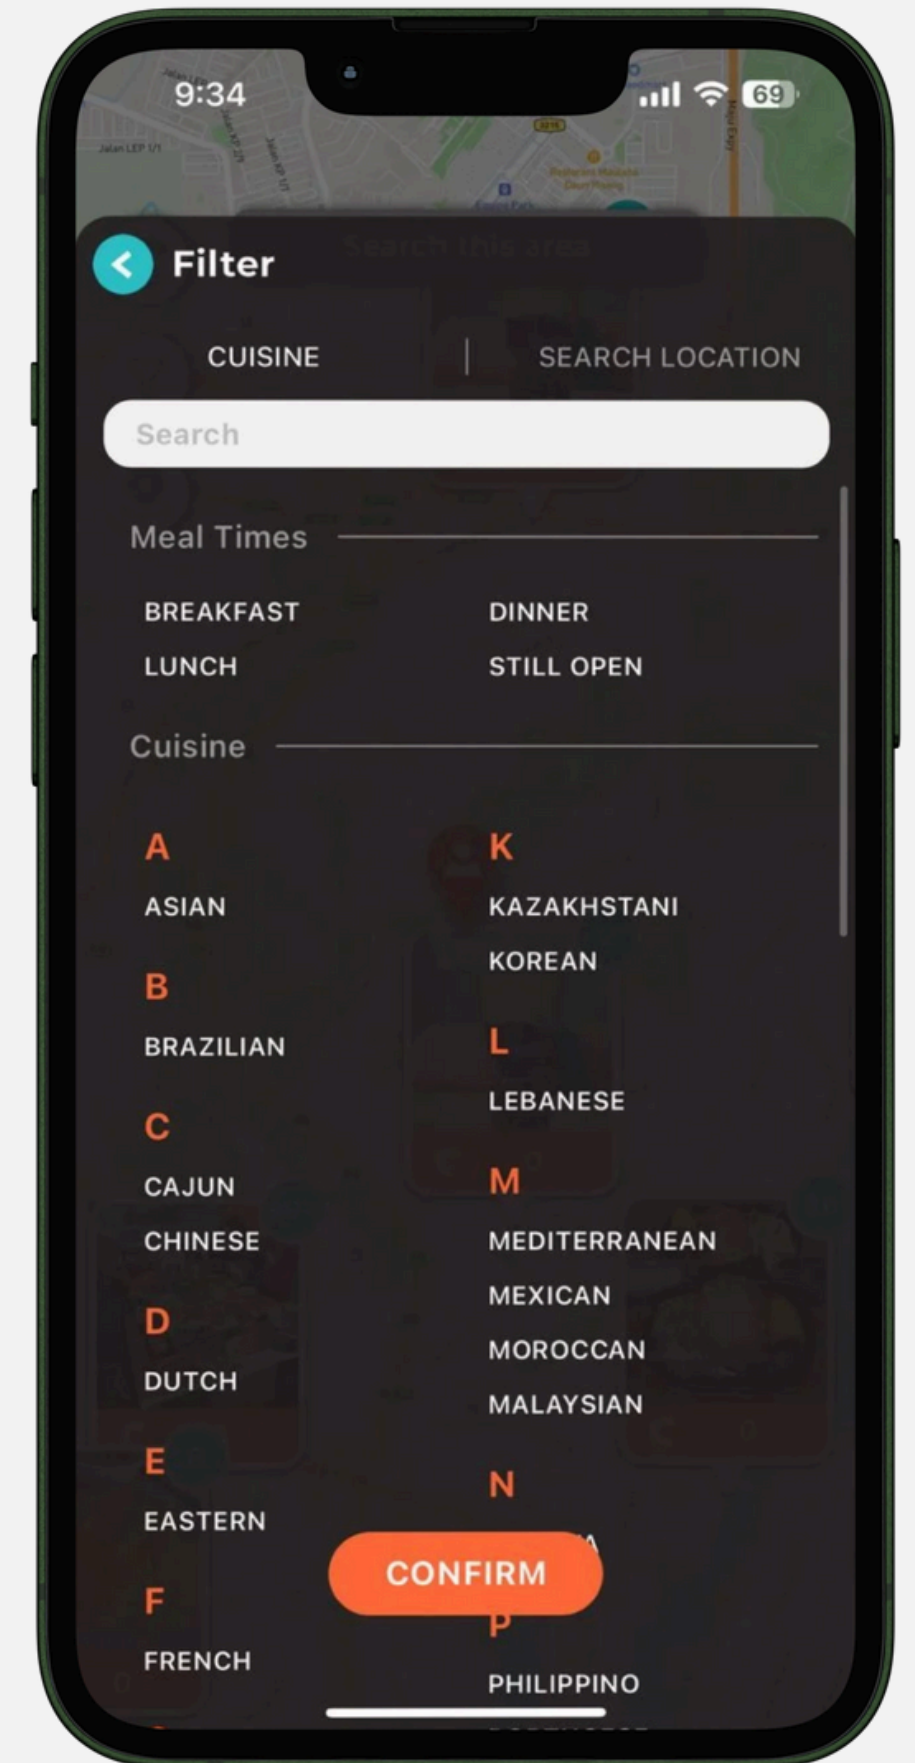

Filtering

- The corner radius for the categories are not the same when selected.

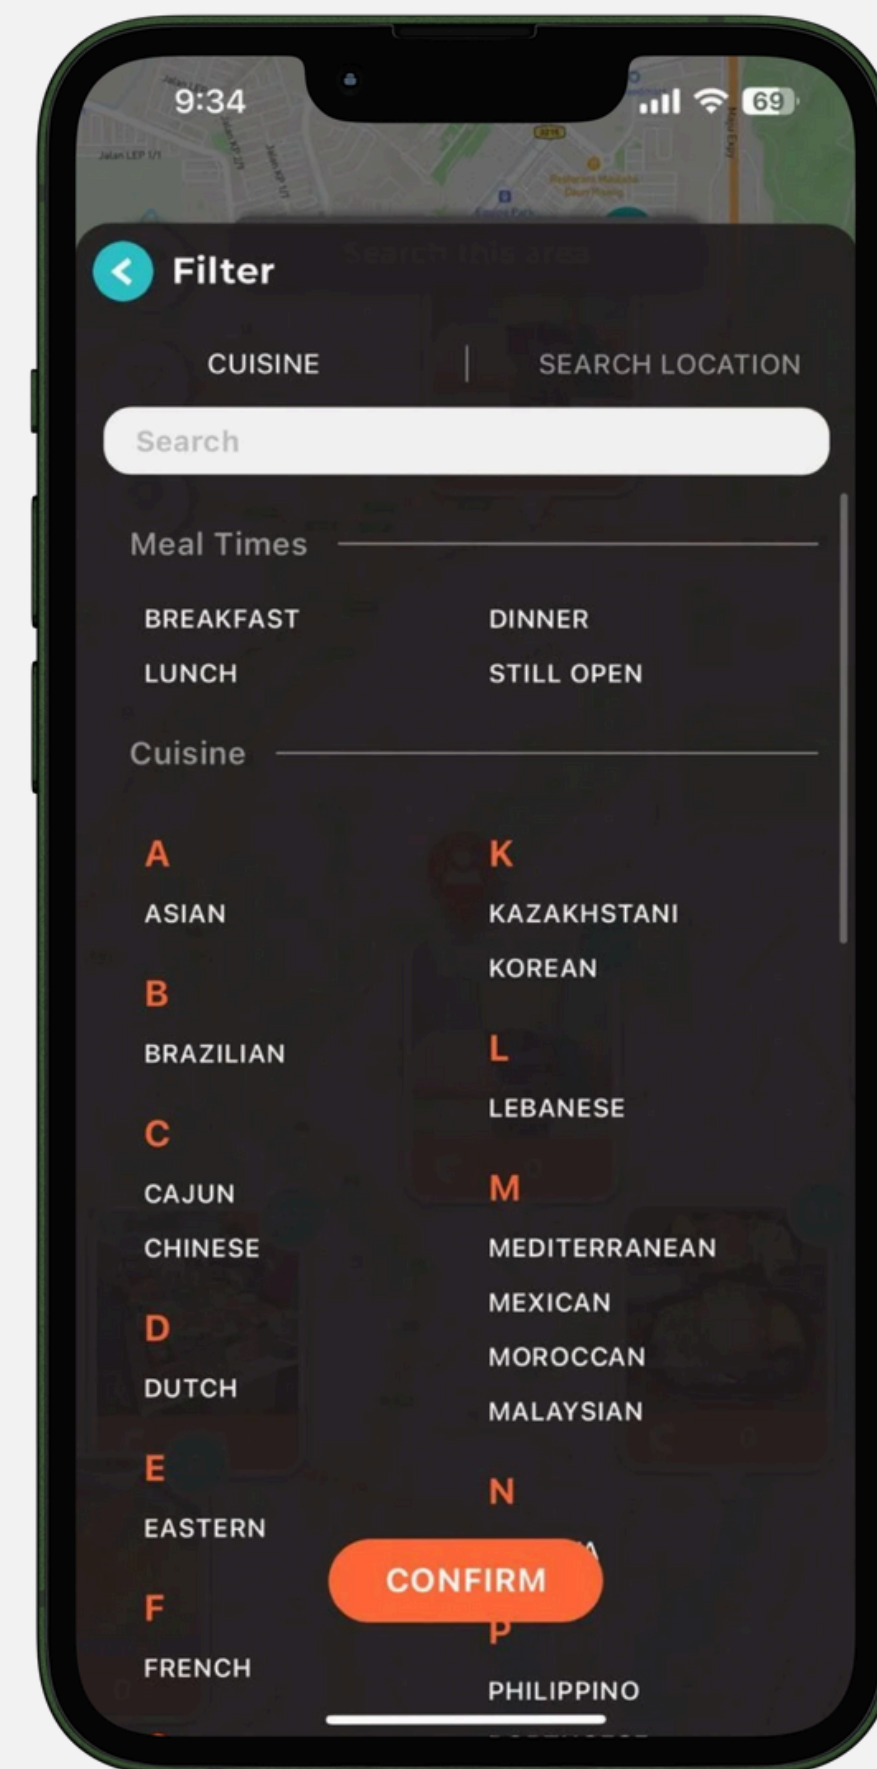

Live App

Filtering

- When selecting the filters, if the user **shifts to another app in between**, all the filters clicked will disappear.

Live App

Filtering

- The filtering tab is less responsive as it takes users multiple click/taps to select a filter.

Live App

Carousell

Carousell

- It is very slow(laggy) if a picture is **Liked or Craved.**

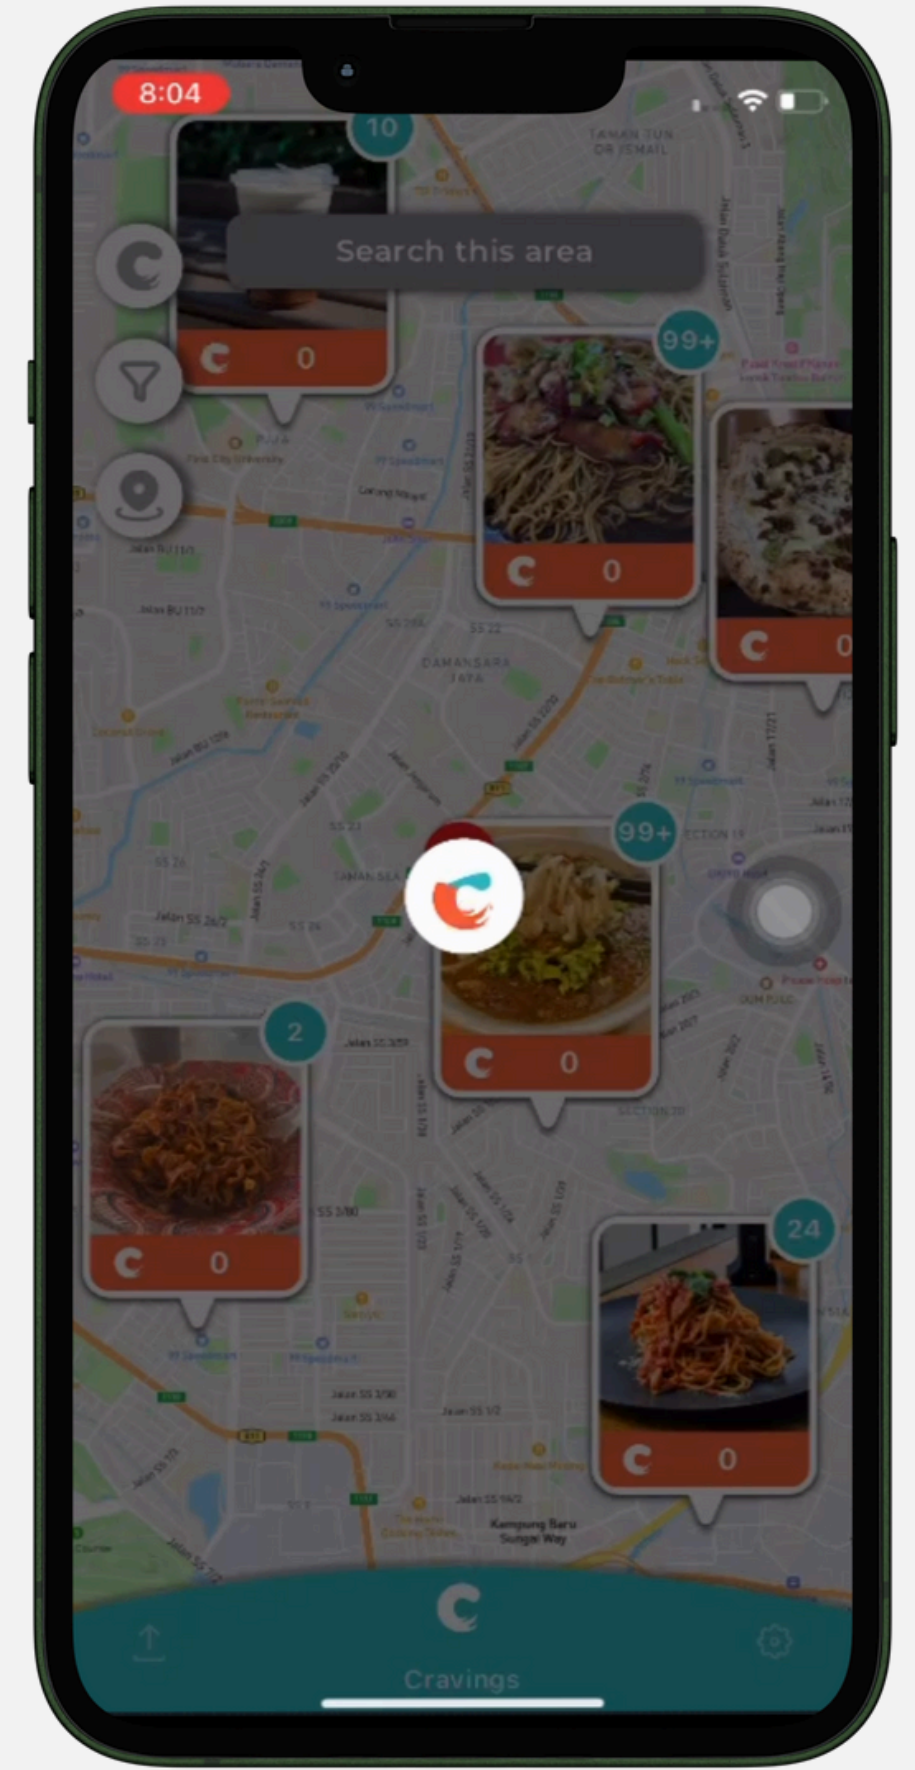

Live App

Posting

Posting

- When a user uploads a photo and the network is **disconnected and reconnected again**, the loading animation will keep on looping.

Live App

Thank you
